

Although a majority of the survey respondents were over the age of 40, social networking has been employed by many as a means of communication. The survey revealed 78.6% of the respondents use Facebook with YouTube a close second at 52.4%. While face-to-face contact remains the preferred method of receiving information about labor issues, Internet and E-mail were next on the list as a communication preference. The survey also discovered a majority of respondents would not be opposed to receiving text messages about labor issues on their cell phones as long as the information was important.

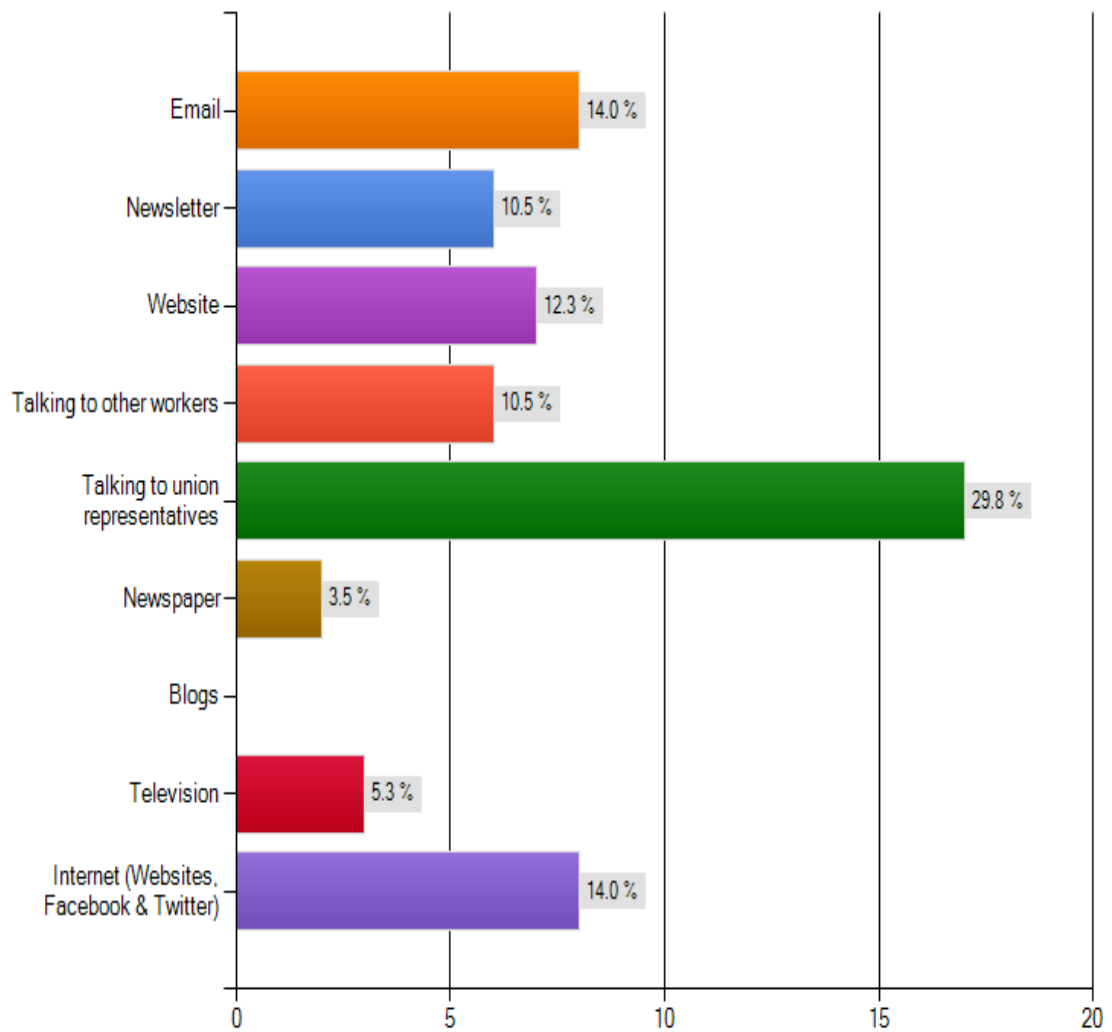

## **Survey Question 1**
